

Helping build a better Guernsey

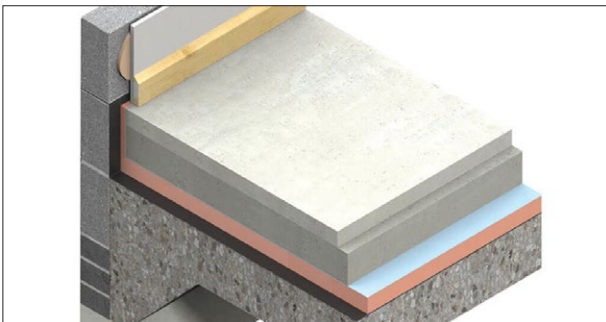

Norman
Piette

We have pleasure in inviting you to a

CPD Seminar

in conjunction with

The benefits of Phenolic Insulation

Focusing specifically the Kingspan Kooltherm K100 Range, which has a thermal conductivity as low as 0.018 W/mK - the most thermally efficient insulation products commonly used.

It looks at the different applications available and other design considerations, such as daylighting and internal space within a building.

Learning Objectives:

- **Understanding the science of thinner insulation.**
- **Be able to identify approved application for phenolic insulation.**
- **Be able to identify the benefits of using phenolic insulation.**

Thursday 30th September 2021
St Pierre Park Hotel

Programme:

- 12-12.30pm - Coffee and Registration
- 12.30pm - Presentation
- 1.30pm - Lunch
